Stain Resistant

EDUCATION

PolyVision, the largest provider of CeramicSteel surfaces for the education market, has supplied writing surfaces for more than 8 million classrooms worldwide, impacting more than 250 million students each day, offering exceptional style plus the durability to withstand the rigors of any learning environment.

COMMERCIAL

PolyVision's proprietary CeramicSteel surfaces are the preferred choice for commercial applications. e³ CeramicSteel surfaces are made for life so the surface will never ghost, stain or scratch, keeping your ideas looking great year after year.

POLYVISION HOLDS THE FOLLOWING CERTIFICATIONS:

MEET THE WORLD'S MOST POPULAR WRITING SURFACE

Unmatched for sleek, smooth consistency, PolyVision e3™ CeramicSteel Whiteboards are made to endure—beautifully. It is the most popular writing surface and covers a world of architecture and infrastructure, defying scratches, stains, weather, pollutants and fire. For uniformity, aesthetics and durability, PolyVision whiteboards are the choice for schools, universities, colleges, hospitals and corporate meeting rooms... wherever your imagination takes you.

Choose from high gloss, low gloss and projection surface options to suit your space.

TECHNICAL INFORMATION

- Writeability - can be written on with dry-erase, semi-permanent, water-soluble or permanent marker, chalk, pen or crayon
- Erasability - no ghosting and easy to maintain; dry-erase marker ink can be wiped off easily with a dry cloth or standard eraser and semi-permanent and permanent marker pen inks can be removed with a solvent-based cleaner
- Wearability - high resistance to impact damage, abrasion, scratching and colour fading
- Visibility - sharp, clear and distinct marker lines provide maximum colour contrast
- Safety - bacteria, chemical and fire resistant - will not combust or release toxic fumes in the event of fire
- Variety - standard and premium colour frame finishes available
- PolyVision e3™ CeramicSteel is warranted for as long as it is installed and in use.

“Gilkon whiteboards are the choice for schools, universities, colleges, hospitals and corporate meeting rooms.”

THE PERFECT SURFACE FOR EVERY SPACE

Choose from high gloss, low gloss and projection surface options to suit your space.

Unmatched for sleek, smooth consistency, PolyVision e3™ CeramicSteel is made to endure—beautifully. It is the most popular writing surface defying scratches, stains, weather, pollutants and fire.

e3™ CERAMICSTEEL DUO

Optimised Surface for Projection PLUS Writing and Erasing.

High performing, multifunctional whiteboard surfaces that work with both analog and digital information are now an increasingly important tool for everyday learning and collaboration.

e3™ CeramicSteel duo increases collaboration by making the transition between projection and writing seamless, with no need to close blinds or darken the room. Better visibility increases participation, while also minimising classroom and meeting distractions.

With strict flatness tolerances, e3™ CeramicSteel duo supports:

- short throw and long throw data projectors
- infrared frames
- interactive projectors
- camera-based solutions

Our whiteboards can be made to order to specifically fit your specifications. We offer framing and mounting options to suit any type of installation. For more, please call **02 9914 0900**, email sales@gilkon.com.au, or visit architects.wilsongilkes.com.au.

Wilson and Gilkes

Wilson & Gilkes is a proud Australian company with a history spanning five decades. We focus on innovative design, engineering and state of the art manufacturing, working with other renowned manufacturers around the world to bring market-leading products to Australia. Wilson & Gilkes is Australia's first choice for the supply of high quality, pioneering and robust equipment.

Wilson & Gilkes Environmental Commitment

Wilson and Gilkes only work with partners who are committed to environmental stewardship.

PolyVision strives for continuous improvement in all areas of environmental stewardship – responsible use of raw materials, natural resources, design processes and operation of all facilities – to protect, replenish and restore the communities in which we live and serve. Third-party environmental certification assures customers and end users that the products they select support healthy indoor air quality and do not emit harmful chemicals.

PolyVision e³ CeramicSteel, which contains no VOCs and is 99.9% recyclable, is the only CeramicSteel surface to achieve global Cradle to Cradle Certified^{CM} Silver. The Cradle to Cradle Certified^{CM} program focuses on the characteristics of sustainable materials, products and systems.

The process places major emphasis on the human and ecological health impacts of a product's ingredients as well as its ability of that product to be truly recycled or safely composted. The type of energy used to create a product, water quantity and quality, and social responsibility are also essential sustainability characteristics on which the Cradle to Cradle Certified^{CM} program is focused.
